

In 2010 I did a traineeship with a production company, which included me doing my certificate 3 in live production and technical events at ETETC. After completing my certificate 3, I was nominated for a training award by my school and then a few months later I got the news that I had one the award. During that time that I was working on my Certificate 3 and I was fortunate enough to work with All Access which included my working on some amazing shows and concerts. I am now working on my certificate 4 in Live Production and Technical events and every production that ALL ACCESS allows me to be involved with, brings me one step closer to achieving my dream career in Live Production.

I am truly grateful for every opportunity that ALL ACCESS and ETETC have given me and I will consider my self very lucky to extend the relationship with them as long as possible.
